SUMMARY

Third-year Computing Science co-op student with professional experience in municipal IT and hands-on ownership of production software platforms. Skilled in full-stack development, backend systems, API integrations, payment infrastructure, automation, and technical troubleshooting, with experience building products used by real customers. Seeking a Winter 2027 software engineering co-op where I can contribute across product development, systems integration, and reliable backend engineering.

EDUCATION

Thompson Rivers University

Kamloops, BC

Bachelor of Computing Science (Co-op Program)

2023 – Present

- Third-year student focused on software engineering, information systems, and computer networks
- Relevant coursework: Computer Networks, Operating Systems, Web-Based Information Systems

EXPERIENCE

Systems Analyst Intern

June 2026 – Present

City of Merritt

Merritt, BC

- Managed **163 assigned IT tickets**, with **135 completed**, spanning Windows troubleshooting, application support, access management and hardware
- Handled **87 onboarding/offboarding-related tickets** covering employee accounts, permissions and equipment provisioning and collection
- Developed a **CityWide REST API runbook** through curl and PowerShell testing, documenting authentication, API constraints and onboarding/offboarding workflows

Co-Founder & Technical Lead

March 2026 – Present

BecomeAfish

Next.js, TypeScript, PostgreSQL, Stripe

- Built and launched a booking and payments platform supporting **108 registered accounts** and **133 scheduled lessons**, processing nearly **CAD \$5K within approximately two months** of commercial operation
- Engineered geographic instructor matching, role-based portals, and Stripe webhooks; automated **eight workflows** covering payroll batching, reconciliation, and notifications
- Built campaign attribution, AI-assisted blog/newsletter automation, social publishing integrations, and technical SEO tooling; implemented analytics tracking **4,967 pageviews over 61 days**

Co-Founder & Software Engineer

July 2025 – Present

InferenceSaver

Next.js, React, TypeScript, Convex, Stripe

- Co-founded and developed a production **AI API gateway and multimodal generation platform** providing unified access to language, image, video, music, and voice models for **129 registered users**
- Built product interfaces, backend workflows, authentication, payments, affiliate systems, and model integrations supporting **\$5.6K+ in confirmed platform credit allocations across 60 top-ups**
- Diagnosed a Stripe idempotency defect affecting **8 of 14 completed checkouts**, implemented retry-safe payment writes, and restored music and voice integrations used for **88 production generation jobs**

PROJECTS

AgentMemory

28,275 Stars / 2,454 Forks – GitHub

Open Source Contributor

github.com/rohitg00/agentmemory

- Contributor since day one on **AgentMemory**, a persistent memory layer for AI coding agents (Claude, Cursor, Copilot, Codex) ranked **#1** on real-world memory benchmarks
- Project has grown to **28,275+ GitHub stars** and **2,454 forks**; contributed through its early growth as an active TypeScript codebase contributor

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, Java, SQL, Rust, PowerShell, HTML/CSS

Frameworks: Next.js, React, Node.js, Prisma

Backend & Data: Convex, PostgreSQL, Supabase, REST APIs, Webhooks, OAuth, RBAC, Session Authentication

Cloud & Development: Vercel, Git, GitHub, Docker, Linux, CI/CD, Automated Testing, Scheduled Jobs

Platforms & Integrations: Stripe, Resend, Twilio, Google APIs, Meta Graph API, GA4

IT Systems: Windows Administration, Microsoft 365, SmartDeploy, BitLocker, Device Deployment, Identity & Access Management
